

MBAERI EMMANUEL CHIDERA

Full-Stack Developer | React | Node.js

+234 906 141 8974 | embaeri@gmail.com | Imo, Nigeria (Remote) | github.com/Gentle-Nuel

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience designing, building, and deploying web and mobile applications for real clients. Experienced across React, React Native, Node.js, PostgreSQL, RESTful APIs, authentication, database security, and deployment. Strong focus on maintainable software, data integrity, secure access control, and end-to-end delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML, CSS
Frontend: React.js, React Native (Expo), React Router, Zustand, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, Supabase Edge Functions
Databases: PostgreSQL, Supabase, Row-Level Security (RLS)
Auth & Security: RBAC, JWT, Supabase Auth, authentication event gating
Development & Deployment: Git, feature branches, pull requests, SQL migrations, Vercel, Netlify
Design: UI/UX Design, Figma

EXPERIENCE

Freelance Full-Stack Developer & Designer | Code and Canvas *Imo, Nigeria (Remote) | 2024 - Present*

- Design and develop full-stack web and mobile applications end to end, from requirements through deployment.
- Build frontend and backend functionality using React, React Native, Node.js, PostgreSQL/Supabase, authentication, and APIs.
- Deliver iteratively through feature branches, pull requests, incremental builds, and SQL migrations.
- Manage client relationships, project scoping, implementation, and delivery independently.

SELECTED PROJECTS

EODEPos - Retail Management & POS Application *React Native (Expo), Supabase, PostgreSQL, Vercel | June 2026 - Present*

- Built and shipped a native Android application for a paying retail client, now in active daily use for POS, pricing, inventory, and receipt delivery.
- Implemented role-based authentication and separate admin/attendant interfaces to control access to sensitive operations.
- Built inventory restocking approval workflows and low-stock/out-of-stock views for operational management.
- Implemented secure attendant deactivation through a Supabase Edge Function while preserving historical sales attribution.
- Developed using feature branches, pull requests, and SQL migration files throughout the build.

Batchkeeper - Production Tracking PWA *React, TypeScript, Vite, Tailwind CSS, Zustand, Supabase, PostgreSQL, Vercel | August 2026*

- Built and deployed a full-stack PWA for production, batch, material, inventory, and cost tracking.
- Implemented multi-business data isolation using PostgreSQL Row-Level Security and an offline write queue with automatic synchronization on reconnect.
- Ran real end-to-end usability testing on live devices that surfaced two friction points, missing live password validation and no field visibility toggle, both fixed the same day.
- Closed the gap between design and build with a full audit of every screen against the original wireframes, adding missing empty states and confirmation dialogs based on real usage gaps found.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science | Federal University of Technology Owerri (FUTO)
2021 - 2026
